## Why EC Solutions?

Essential Compliance Solutions' knowledge and experience providing building compliance solutions has given us a superior and unparalleled skillset to ensure your facility is meeting compliance standards. The ECS group can draw on its vast resources of Engineers and compliance consultants to provide all the appropriate solutions to ensure the continued compliance of your building.

## Fire Door Compliance

Ensuring your facility is compliant and adheres to relevant Australian Standards is paramount to ensure the safety of your occupants in the case of an emergency. Essential Compliance Solutions can provide a wide range of products and services to ensure the safety of your building and the safe egress of your building's occupants in the case of an emergency.

The ECS group can provide an assessment and review of your building's fire and smoke doors to certify they meet Australian Standards. In the case of non-compliant doors, ECS can install missing elements such as door tags, intumescent fire door seals, smoke seals and appropriate door signage to ensure your facilities fire and smoke doors are compliant.

If any of the previous mentioned elements are missing, the fire / smoke door may be deemed to be non-compliant with relevant Australian Standards.

## Standards

The National Construction Code (NCC) requires that all fire doors, be installed in accordance with Australian Standard AS 1905.1. Over time, fire and smoke doors may become damaged or be installed with incorrect or non-compliant door furniture. In these cases, fire and smoke doors may be determined as being non-compliant under Australian Standards AS 1905.1 and AS 1851.

Fire doors are expensive to replace, therefore scheduling a review and assessment of your facilities fire and smoke doors is a more economical alternative.

ECS can provide a comprehensive and detailed assessment of your facility's fire and smoke doors to ensure they are compliant with relevant Australian Standards. Properly maintained and compliant fire and smoke doors will reduce the spread of fire in the case of an emergency.

## Building Compliance

Essential Compliance Solutions can provide a number of products and services to ensure that your facilities are meeting relevant Australian Standards and Building codes. We work with you to ensure your facilities are maintaining appropriate safety measures to mitigate the risk of fire spread and ensure the safe and orderly egress of occupants in the case of an emergency.
