## Why EC Solutions?

Essential Compliance Solutions' knowledge and experience in developing effective and compliant Evacuation Diagrams has given us a superior and unparalleled product that meets all minimum as well as optional elements outlined in Australian Standard AS 3745. The ECS group can draw on the resources of specialist Architects, Engineers and compliance consultants to provide appropriate solutions to ensure the continued compliance of your building.

## Standards and Compliance

ECS Evacuation Diagrams comply strictly with the Australian Standard AS 3745 (2010) "Planning for Emergencies in Facilities". ECS is committed to exceeding the minimum requirements stated in AS 3745, delivering a superior product that fulfils both the minimum and optional elements of this Standard.

Our Evacuation Diagrams include;

- Evacuation routes
- Designated assembly areas
- Emergency equipment locations
- Emergency response contacts
- Surrounding streets and buildings
- R.A.C.E. Evacuation Procedures
- Facility information
- Correct position and orientation
- Correct logos and sizing
- Exit signage

## What is the process?

### Stage 01.

Initial site evaluation (Review of Occupancy Permit and National Construction Code requirements).

### Stage 02.

Documentation of existing conditions, including preliminary draw up and identification of fire equipment.

### Stage 03.

Design of Evacuation Diagrams (Including path of egress, assembly areas, Diagram location and orientation).

### Stage 04.

Assembly and installation of Evacuation Diagrams in accordance with Australian Standards.
